Acknowledgments	xvii
Introduction	xix
1 Planning Your Mac Rollout	1
Choosing Who Gets a Mac	2
Choosing Suitable Macs for Your Staff	3
Choosing Macs for Desktop Users	3
Choosing Macs for Mobile Users	5
Choosing Which Version of Mac OS X to Use	7
Deciding How to Manage the Macs on the Network	8
Use Active Directory Authentication and Network Home Folders Only	8
Manage the Macs Through Active Directory	9
Manage the Macs Through Mac OS X Server	9
2 Connecting the Macs to the Network and Active Directory	13
Creating User Accounts for the Mac Users	14
Creating Computer Accounts for the Macs	16

X Integrating Macs into Windows Networks

Making the Physical Connection to the Network	17
Connecting a Mac via Ethernet	17
Connecting a Mac to a Wireless Network	19
Binding a Mac to Active Directory	24
Performing the Binding	24
Choosing Advanced Options for Binding	
a Mac to Active Directory	28
Changing the Mac's Search	
Policy for Active Directory	32
Testing the Active Directory Binding	
with the id Command	36
Testing the Active Directory Binding	
with the dscl Command	37
Troubleshooting the "Invalid Domain"	
Error Message when Binding to Active Directory	39
3 Binding a Mac OS X Server to	
Manage Macs via a "Magic Triangle"	43
Installing Mac OS X Server on a Mac	44
Choosing Which Disk to	
Install Mac OS X Server On	45
Customizing the Installation	48
Performing the Initial Configuration	50
Updating Your Server with the Latest Fixes	66
Binding the Mac Server to the Network	68
Turning On the Open Directory Service	69
Turning Your Mac Server into	
a Standalone Directory Server	71
Binding the Mac OS X Server to Active Directory	73
Turning Your Mac Server into an	
Open Directory Master Server	75
Disabling Kerberos on Your Open Directory Master	76
Joining the Mac Server to the	
Active Directory Kerberos Realm	77
Setting Your Mac Clients to Connect	
to Open Directory and Active Directory	78
Setting Up Open Directory Groups	
for Managing Your Macs	79
Creating an Open Directory Group	80
Adding a Test Managed Preference	84
Testing the Managed Preference for the Group	86
Removing the Managed Preference	88

4 Extending Active Directory to Handle Mac Clients Natively	89
Understanding the Essentials of Extending the Active Directory Schema	90
Understanding the Limitations of a Straightforward Bind	90
Why Do You Need to Extend the Schema?	91
Storing Mac OS X Data in Active Directory	91
Understanding How the Process of Extending the Schema Works	91
Getting Ready to Extend the Schema	92
Windows Server	92
Mac Server	94
Mac Client	95
Windows PC	97
Getting the Schema Extensions You Need	97
Editing the LDIF File to Make It Right	104
Double-Checking the LDIF File	108
Applying the Schema Extensions to Active Directory	109
Turning Workgroup Manager on to Active Directory	110
Applying Test Policy to Users and Groups	112
Checking That Your Test Policy Works	114
Creating a Computer List	116
Indexing the macAddress Attribute to Speed Up Active Directory Searches	120
5 Giving Your Macs Safe Access to the Internet	123
Establishing Basic Internet Connectivity	124
Checking for Internet Connectivity	124
Checking Which DNS Server the Mac Is Using	124
Restraining Mac Clients with Proxy Servers	127
Using Policy to Set Macs to Use a Proxy Server	127
Manually Setting a Mac to Use a Proxy Server	129
Checking That Proxying Is Working	132
Protecting Macs Against Viruses and Malware	132
6 Connecting Macs to Microsoft Exchange	135
Creating a Mailbox for a Mac User in Exchange	136
Connecting Mac OS X Mail to Exchange	141
Choosing Mail Account Settings	145
Choosing Account Information Settings	145
Choosing Mailbox Behaviors Settings	147
Choosing Advanced Settings	149

Saving the Changes to the Mail Settings	151
Turning Off Mail's Junk Mail Filtering	151
Using iCal and Address Book with Exchange	152
Using iCal with Exchange	152
Using Address Book with Exchange	154
7 Providing Home Folders and File Services to Macs	157
Providing Home Folders for Mac Users	158
Understanding Local Home Folders and When to Use Them	158
Understanding Network Home Folders and When to Use Them	162
Understanding Mobile Accounts and Portable Home Directories—and When to Use Them	164
Hosting Network Home Folders on Mac OS X with a Magic Triangle	172
Connecting Macs to Network Folders	187
Setting Up a Network Folder on Windows Server	187
Setting Up a Network Folder on Mac OS X Server	187
Connecting Mac Users to Network Folders	187
8 Setting Up Printing on Macs	189
Understanding Your Options for Printing from Macs	190
Understanding How Printing Works for Networked Macs	191
The Role of the PDF in Mac Printing	191
What PostScript Printer Description Files Do and Where You Get Them	193
How CUPS Uses Filters to Convert Print Jobs	193
How Windows Controls Access to the Print Queues	194
Putting Printing Essentials in Place	194
Deploying Printers for Mac Users	194
Setting Up Print And Document Services as Needed	195
Getting the Printer Drivers onto the Macs	196
Setting Up the Printers on Your Macs	197
Adding Printers by Using Policy	197
Adding Printers to Your Macs Manually	204
Managing Print Jobs on Your Printers	209
Giving Your Printer Users Single Sign-On for Printers	211

9 Installing and Updating Software	215
Keeping Your Macs' Software Up to Date	216
Understanding the Options for Getting Software Updates	216
Setting Up a Mac to Receive Software Updates the Regular Way	217
Setting Your Mac OS X Server to Provide Software Updates	218
Setting a Client Mac to Download Updates from Your Update Server	222
Installing the Updates	225
Installing Applications on Your Client Macs Before Deployment	226
Understanding Your Options for Installing Applications Before Deployment	227
Setting Up a Mac Manually	227
Setting Up a Mac Using a Disk Image	227
Creating Your Own Package Files	249
Saving Your Package Description Document	249
Setting the Title and Options for the Package Description Document	250
Adding Files to the Package Description Document	255
Setting Options for the Choice	255
Setting Options for the Package	256
Building the Package File	260
Installing Applications on Your Client Macs After Deployment	261
Deploying Applications Through Screen Sharing	262
Deploying Applications Through Apple Remote Desktop	265
Controlling the Applications and Widgets a User Can Run	273
Getting Ready to Restrict the Applications and Widgets	273
Restricting the Applications the User Can Run	274
Choosing Which Widgets the User Can Run	277
Choosing Whether the User Can Run Front Row	278
10 Run Windows Programs on Macs	279
Understanding the Options for Running Windows Programs on Macs	280
Running Windows Programs Using Remote Desktop Connection	281

Setting Up Remote Desktop Services for Macs	281
Installing Remote Desktop Connection on the Mac	282
Connecting via Remote Desktop Connection	282
Running Windows Programs Using a Virtual Machine	292
Choosing a Virtual-Machine Application	293
Installing the Virtual-Machine Application	293
Creating a Virtual Machine	294
Running Windows Programs Using Boot Camp	302
Understanding the Process of Setting Up Boot Camp	303
Using Boot Camp Assistant to Create a New Partition	303
Installing the Mac Hardware Drivers	305
Installing Antivirus Software	306
Updating Windows with the Latest Service Pack and Patches	307
Installing the Programs You Need	307
Returning to Mac OS X from Windows	307
11 Providing Remote Access for and to Macs	309
Giving Mac Users Access to Your Windows VPN	310
Adding a Mac OS X Server VPN to Your Windows Network	311
Turning On the VPN Service	311
Configuring the VPN Service	312
Starting the VPN	317
Setting Up the VPN Connection on the Macs	317
Setting a Client Mac to Connect to the VPN	317
Choosing Advanced VPN Settings	320
Connecting a Mac to a VPN	326
Allowing Remote Access to Macs on the Network	327
Giving a Mac a Public IP Address	327
Routing Particular Ports to a Mac	327
Connecting Using Back To My Mac	328
12 Backing Up and Restoring Macs	331
Planning How You Will Back Up Mac Users' Files	332
Backing Up Your Macs with Time Machine	333
Backing Up a Standalone Mac with Time Machine	334
Backing Up Macs and a Mac Server with Time Machine	338
Recovering Data Using Time Machine	343
Recovering the Server Using Installer	345
Backing Up Macs with Third-Party Backup Software	345

13 Recovering from Disasters on Macs	347
Dealing with Hangs and Lockups	348
Dealing with Application Hangs	348
Dealing with Lockups	350
Repairing Permissions Errors	350
Verifying Disk Permissions	
to See If There’s an Error	351
Repair Errors in Disk Permissions	353
Repairing Disk Errors	354
Verifying a Disk to See If It Contains Errors	355
Repairing Disk Errors	357
Forcing a Disk Check and Repair with Safe Mode	359
Fixing Problems with fsck	361
Reinstalling Mac OS X	362
14 Adding Macs to Small Windows Networks	363
Connecting the Macs to the Network	364
Configuring an Ethernet Connection	364
Configuring a Wireless Connection	366
Sharing an Internet Connection	369
Sharing an Internet Connection via	
a Router Connected to the Network	369
Sharing an Internet Connection Connected	
Directly to a Computer	370
Sharing Printers	373
Setting a Windows PC to Share a Printer	373
Connecting a Windows PC	
to a Printer Shared by a PC	376
Connecting a Windows PC	
to a Printer Shared by a Mac	379
Setting a Mac to Share a Printer	380
Connecting a Mac to a Shared Printer	383
Sharing a Folder	385
Setting a Windows PC to Share a Folder	386
Setting a Mac to Share a Folder	388
Connecting a PC to a Shared Folder	392
Connecting a Mac to a Shared Folder	394
Index	397
