ACKNOWLEDGMENTS .....	xvii
INTRODUCTION .....	xix

## PART I

### The Windows Server 2003 Environment

<b>1 Exploring Windows Server 2003 .....</b>	<b>3</b>
<b>Critical Skill 1.1</b> Understand the Reasons for Windows Server 2003 .....	4
<b>Critical Skill 1.2</b> Compare Windows Server 2003 Editions .....	5
Hardware Differences .....	6
<b>Critical Skill 1.3</b> Understand Windows Server 2003 Components .....	7
<b>Critical Skill 1.4</b> Deploy Windows Server 2003 .....	8
Prepare for Windows Server 2003 .....	10
Set Up Windows Server 2003 .....	10
<b>Critical Skill 1.5</b> Network Windows Server 2003 .....	10
<b>Critical Skill 1.6</b> Communicate and Use the Internet with Windows Server 2003 ....	13
<b>Critical Skill 1.7</b> Administer Windows Server 2003 .....	15
File System Management .....	15
Printing Management .....	16
General System Management .....	16
Security Management .....	18
<b>Project 1</b> Identify the Functions You Need .....	20
Module 1 Mastery Check .....	22

<b>2 Migrating to Windows Server 2003</b>	23
<b>Critical Skill 2.1</b> Evaluate Your Organization's Size	24
Larger Organization Migration	24
Smaller Organization Migration	26
<b>Critical Skill 2.2</b> Evaluate Your Hardware and Software	26
Windows Server 2003 Hardware Friendliness	27
Windows Server 2003 Software Considerations	28
<b>Critical Skill 2.3</b> Evaluate Your Networking Environment	28
<b>Critical Skill 2.4</b> Evaluate Your Security Demands	30
Kerberos Authentication	30
Public Key Infrastructure	31
File Encryption	31
Smart Cards	32
<b>Critical Skill 2.5</b> Evaluate Support for the Internet	33
Built-In Communications Infrastructure	33
Accessing the Internet	33
Internet Information Services	35
Built-In Support for Virtual Private Networking	35
<b>Project 2</b> Deciding Whether to Migrate	36
Module 2 Mastery Check	38

## PART II

### Deploying Windows Server 2003 and Windows XP Professional

<b>3 Preparing for Installation</b>	41
<b>Critical Skill 3.1</b> Consider Installation Needs	42
<b>Critical Skill 3.2</b> Check System Requirements	42
About System Requirements	43
Check Hardware Compatibility	45
Handle Incompatible Devices	50
<b>Critical Skill 3.3</b> Make Correct Installation Choices	52
Decide to Upgrade or Perform New Installation	52
Decide Whether to Dual-Boot	54
Choose the File System	56
Decide on Partitioning	57
Choose the Type of License	57
Choose Optional Components	58
Choose Network Naming Conventions	66
Decide to Use Domains or Workgroups	68
<b>Critical Skill 3.4</b> Prepare Systems for Installation	70
Back Up All Hard Disks	70
Inventory Current Software	71
Clean Up Current Files	71

Upgrade Hardware .....	72
Disable Conflicting Hardware and Software .....	72
Prepare a Windows NT Domain .....	74
<b>Critical Skill 3.5</b> Plan a Windows Server 2003 Migration .....	74
<b>Project 3</b> Complete an Installation Check List .....	76
Module 3 Mastery Check .....	78
<b>4 Installing Windows Server 2003 .....</b>	<b>81</b>
<b>Critical Skill 4.1</b> Choose a Setup Method .....	82
<b>Critical Skill 4.2</b> Start Setup .....	82
Start over a Network .....	83
Start Locally .....	84
<b>Critical Skill 4.3</b> Run Setup .....	88
Run a Clean Install Started from a Newer Windows Version .....	89
Run a Clean Install Started in Other Ways .....	96
Running an Upgrade .....	99
<b>Critical Skill 4.4</b> Activate and Register the Software .....	102
<b>Critical Skill 4.5</b> Configure a Server .....	104
Before You Configure .....	104
Server Roles .....	107
<b>Project 4</b> Prepare an Installation Plan .....	117
Module 4 Mastery Check .....	119
<b>5 Rolling Out Windows XP Professional .....</b>	<b>121</b>
<b>Critical Skill 5.1</b> Run a Clean Install Started from a Newer Windows Version .....	122
Initial GUI Phase .....	122
Intermediate Character-Based Setup Program Phase .....	125
Final GUI-Based Setup Phase .....	126
Activate Windows XP .....	127
<b>Critical Skill 5.2</b> Run a Clean Install Started in Other Ways .....	129
Character-Based Setup Program .....	129
GUI-Based Setup Wizard .....	131
<b>Critical Skill 5.3</b> Run an Upgrade .....	133
Initial GUI Phase .....	133
Final GUI Phase .....	135
<b>Critical Skill 5.4</b> Automate Windows XP Installation .....	137
Command-Line Parameters .....	137
<b>Critical Skill 5.5</b> Create and Use Disk Images .....	160
Create a Master Image .....	162
Prepare Control Files for Drive Image Creation .....	162
Prepare a Disk Image .....	164
Copy a Disk Image .....	165
Start Up a Clone for the First Time .....	165

<b>Project 5</b> Prepare an Installation Plan II .....	167
Module 5 Mastery Check .....	169
<b>6 Remote Installation Services</b> .....	171
<b>Critical Skill 6.1</b> Install and Set Up Remote Installation Services .....	173
Install Remote Installation Services .....	173
Set Up Remote Installation Services .....	174
<b>Critical Skill 6.2</b> Configure Remote Installation Services .....	177
Configure RIS to Your Needs .....	177
Create a Remote Installation Boot Floppy .....	179
<b>Critical Skill 6.3</b> Test and Troubleshoot Remote Installation Services .....	180
Test Remote Installation Services .....	180
Troubleshoot Remote Installation Services .....	181
<b>Critical Skill 6.4</b> Extend Remote Installation Services .....	185
Use RIS to Install More Than the Operating System .....	185
Customize the Remote Installation Script .....	188
<b>Critical Skill 6.5</b> Customize the Client Experience .....	192
Customize the Client Installation Wizard .....	192
Allow Custom and Restarted Installations .....	194
<b>Project 6</b> Remote Installation Plan .....	196
Module 6 Mastery Check .....	199

## PART III

**Networking Windows Server 2003**

<b>7 Windows Server 2003 Networking Environment</b> .....	203
<b>Critical Skill 7.1</b> Define Networking .....	204
<b>Critical Skill 7.2</b> Identify Networking Schemes .....	205
Network Types .....	205
The Networking Task .....	208
LAN Technologies .....	213
<b>Critical Skill 7.3</b> Understand Networking Hardware .....	225
Network Interface Cards .....	228
Cabling .....	231
Interconnection Devices .....	240
<b>Critical Skill 7.4</b> Use Network Topologies .....	249
<b>Critical Skill 7.5</b> Implement Networking Protocols .....	250
AppleTalk .....	252
IPX/SPX .....	252
TCP/IP .....	253
<b>Project 7</b> Planning a Network .....	260
Module 7 Mastery Check .....	262

<b>8 Setting Up and Managing a Network</b>	263
<b>Critical Skill 8.1</b> Set Up Network Interface Cards	264
Check the NIC Driver	265
Check NIC Resources	267
<b>Critical Skill 8.2</b> Install Network Functions and Configure Protocols	270
Install Network Functions	270
Choose and Configure a Networking Protocol	272
<b>Critical Skill 8.3</b> Test the Network	276
<b>Critical Skill 8.4</b> Review Server Support and Network Addressing	279
Network Addressing	279
<b>Critical Skill 8.5</b> Set Up DHCP, DNS, and WINS	280
Set Up the Dynamic Host Configuration Protocol	281
Set Up the Domain Name System	291
Set Up Windows Internet Name Service	297
<b>Critical Skill 8.6</b> Set Up User Accounts and Group Permissions	300
<b>Project 8</b> Make Sure Networking Is Properly Set Up	305
Module 8 Mastery Check	307
<b>9 Using Active Directory and Domains</b>	309
<b>Critical Skill 9.1</b> Review the Active Directory Environment	310
Integration with DNS	312
Active Directory and Domains	312
<b>Critical Skill 9.2</b> Install Active Directory	316
Replace Existing Domain Controllers	318
<b>Critical Skill 9.3</b> Understand Active Directory Structure and Configuration	323
Active Directory Objects	323
The Structure of Active Directory	326
Sites	332
<b>Critical Skill 9.4</b> Replicate Active Directory among Sites	333
Internal Site Replication	334
Site-to-Site Replication	334
Collision Detecting and Resolution	336
Active Directory Summary	337
<b>Project 9</b> Plan an Active Directory Implementation	338
Module 9 Mastery Check	340

## PART IV

### Communications and the Internet

<b>10 Communications and Internet Services</b>	343
<b>Critical Skill 10.1</b> Connect Directly Between Two Computers	344
Use a Parallel or Serial Cable	345
Using an Infrared Port	352

<b>Critical Skill 10.2</b>	Set Up and Use Telephony Connections	353
	Install a Modem	354
	Establish a Dial-up Connection	357
	Set Up Remote Access Service	358
	Use Remote Access Service	359
<b>Critical Skill 10.3</b>	Set Up and Maintain the Windows Server 2003 Router	361
	Set Up the Windows Server 2003 Router	361
	Set Up Internet Connection Sharing	362
	Maintain a Windows Server 2003 Router	364
<b>Critical Skill 10.4</b>	Set Up an Internet Connection	365
<b>Critical Skill 10.5</b>	Find Information on the Internet	369
<b>Critical Skill 10.6</b>	Send and Receive Internet Mail	374
	<b>Project 10</b> Plan the Use of Communications and the Internet	380
	Module 10 Mastery Check	382
<b>11</b>	<b>Internet Information Services Version 6</b>	383
<b>Critical Skill 11.1</b>	Explore the IIS 6 Environment	384
	IIS 5 Enhancements	385
	IIS 6 Enhancements	389
	Internet Services in IIS 6	393
<b>Critical Skill 11.2</b>	Install IIS 6	394
	Install IIS from Scratch	394
<b>Critical Skill 11.3</b>	Migrate to IIS 6	397
	Plan the Migration	398
	Migration Methods	399
	Preinstallation Requirements	400
	Implement Security	402
<b>Critical Skill 11.4</b>	Customize and Maintain IIS 6	406
	Administer Sites Remotely	407
	Create Web Sites	410
	Host Multiple Sites	412
	Web Site Management	414
	Troubleshoot IIS	417
<b>Critical Skill 11.5</b>	Understand and Manage Windows Media Services	420
	Understand Windows Media Services	421
	Manage Windows Media Services	422
	<b>Project 11</b> Plan the Use of Internet Information Services	424
	Module 11 Mastery Check	427
<b>12</b>	<b>Virtual Private Networking</b>	429
<b>Critical Skill 12.1</b>	Understand VPN	430
<b>Critical Skill 12.2</b>	Use the Point-to-Point Tunneling Protocol	431
	The Point-to-Point Protocol	432
	Microsoft Point-to-Point Encryption	434

<b>Critical Skill 12.3</b> Use the Layer Two Tunneling Protocol .....	434
Internet Protocol Security .....	434
<b>Critical Skill 12.4</b> Prepare for VPN .....	435
Check Networking and RAS Hardware .....	435
Configure Networking .....	437
Set Up Remote Access Service .....	440
Test RAS .....	441
<b>Critical Skill 12.5</b> Set Up a VPN Server .....	443
Reconfigure RAS .....	444
Configure a PPTP Server .....	445
Configure a L2TP Server .....	446
<b>Critical Skill 12.6</b> Set Up a VPN Client .....	453
Set Up a Windows XP VPN Connection .....	453
Set Up a Windows 9x/Me/NT VPN Connection .....	456
<b>Project 12</b> Install Virtual Private Networking .....	458
Module 12 Mastery Check .....	460
<b>13 Terminal Services and Remote Desktop</b> .....	461
<b>Critical Skill 13.1</b> Understand Terminal Services .....	462
<b>Critical Skill 13.2</b> Set Up Terminal Services .....	463
Set Up Terminal Server .....	464
Set Up Remote Desktop Web Connection .....	466
<b>Critical Skill 13.3</b> Manage Terminal Services .....	467
Terminal Services Configuration .....	467
Terminal Services Manager .....	469
<b>Critical Skill 13.4</b> Use Applications Server Mode .....	471
Set Up Remote Desktop Connection .....	471
<b>Critical Skill 13.5</b> Understand User Licensing .....	474
Terminal Server Licenses .....	474
Install a Terminal Server License Server .....	475
Activate a License Server and Install Client Licenses .....	475
Set Up and Enable Users .....	478
Use Terminal Server .....	478
<b>Critical Skill 13.6</b> Use Remote Desktop for Administration .....	482
Enable Remote Desktop for Administration .....	483
Clients for Remote Desktop for Administration .....	483
Managing Through Remote Desktop for Administration .....	483
<b>Critical Skill 13.7</b> Use Remote Desktop .....	484
Put Remote Desktop to Work .....	484
<b>Project 13</b> Plan the Use of Terminal Services and Remote Desktop .....	489
Module 13 Mastery Check .....	491

## PART V

**Administering Windows Server 2003**

<b>14 Managing Storage and File Systems</b>	495
<b>Critical Skill 14.1 Understand Storage and File Systems</b>	496
Types of Storage	496
File Systems	498
File System Management	501
<b>Critical Skill 14.2 Use Disk Management</b>	502
Disk Management Pane	503
Customize the Disk Management Pane	504
Drive and Partition Properties	505
Add and Remove a Disk Drive	507
Partition and Format Drives	509
Data Compression	512
Drive Defragmentation	517
Drive Quotas	518
File and Folder Encryption	519
<b>Critical Skill 14.3 Use Dynamic Volume Management</b>	521
Convert to Dynamic Storage	521
Create Volumes	522
Extend Volumes	523
Create a Spanning Volume	523
<b>Critical Skill 14.4 Use the Distributed File System</b>	524
Create a Distributed File System	525
Manage a Distributed File System	526
<b>Critical Skill 14.5 Handle Removable and Remote Storage</b>	527
Using Removable Storage	527
Understand Remote Storage	532
<b>Critical Skill 14.6 Use Backup Or Restore</b>	533
Types of Backup	533
Use Backup	533
Use Restore	538
Prepare for an Emergency	540
Use Shadow Copies	542
<b>Project 14 Plan the Use of Storage and File Systems</b>	545
Module 14 Mastery Check	547
<b>15 Setting Up and Managing Printing and Faxing</b>	549
<b>Critical Skill 15.1 Understand Windows Server 2003 Printing</b>	550
Printing Concepts	550
Printing Requirements	551

<b>Critical Skill 15.2 Set Up Printing</b>	551
Set Up Local Printers	552
Set Up Network Printers	555
<b>Critical Skill 15.3 Tune a Printer's Configuration</b>	558
Configure Printers	558
Configure Printing	563
Configure Users	564
<b>Critical Skill 15.4 Control a Printer's Queue</b>	567
Pause, Resume, and Restart Printing	567
Cancel Printing	568
Redirect Documents	569
Change a Document's Properties	569
<b>Critical Skill 15.5 Manage Fonts</b>	571
Fonts in Windows Server 2003	572
Add and Remove Fonts	577
Use Fonts	577
<b>Critical Skill 15.6 Set Up and Use Faxing</b>	579
Set Up and Use Faxing from Applications	580
Use the Fax Console	581
Receive Faxes	582
<b>Project 15 Plan for Setting Up and Managing Printing and Faxing</b>	584
<b>Module 15 Mastery Check</b>	586
<b>16 Managing Windows Server 2003</b>	587
<b>Critical Skill 16.1 Use the Control Panel</b>	588
Accessibility Options	590
Folder Options	591
Keyboard	594
Mouse	595
Regional and Language Options	596
Scheduled Tasks	597
System	597
Taskbar and Start Menu	599
<b>Critical Skill 16.2 Use the Task Manager</b>	600
<b>Critical Skill 16.3 Use the Microsoft Management Console</b>	603
Create an MMC Console	603
Use an MMC Console	606
<b>Critical Skill 16.4 Explore the Registry</b>	606
Keys and Subtrees	607
Keys, Subkeys, and Hives	608
Entries and Data Types	610

<b>Critical Skill 16.5</b> Understand the Boot Process .....	612
Boot Files .....	612
Steps in the Booting Process .....	613
Correct Booting Problems .....	615
<b>Critical Skill 16.6</b> Use Group Policies .....	621
Create and Change Group Policies .....	622
<b>Critical Skill 16.7</b> Employ User Profiles .....	626
Create Local User Profiles .....	627
Create Roaming User Profiles .....	627
Use Mandatory User Profiles .....	631
<b>Critical Skill 16.8</b> Update Windows Server 2003 .....	631
Manual Updates .....	631
Automatic Updates .....	633
<b>Project 16</b> Plan the Management of Windows Server 2003 .....	635
Module 16 Mastery Check .....	637
<b>17 Controlling Windows Server 2003 Security</b> .....	639
<b>Critical Skill 17.1</b> Authenticate the User .....	640
Local Computer User Authentication .....	641
Network User Authentication .....	643
<b>Critical Skill 17.2</b> Control Access .....	656
Ownership .....	657
Groups .....	658
Permissions .....	663
<b>Critical Skill 17.3</b> Secure Stored Data .....	671
File and Folder Encryption .....	671
Use File and Folder Encryption .....	674
<b>Critical Skill 17.4</b> Understand Private/Public Key Encryption .....	680
Private Key Encryption .....	681
Public Key Encryption .....	681
Combined Public and Private Key Encryption .....	681
Encryption Keys and Certificates .....	682
<b>Critical Skill 17.5</b> Secure Data Transmission .....	682
Implement Data Transmission Security .....	683
<b>Project 17</b> Plan Security Implementation .....	687
Module 17 Mastery Check .....	689
<b>Answers to Mastery Checks</b> .....	691
Module 1: Exploring Windows Server 2003 .....	691
Module 2: Migrating to Windows Server 2003 .....	692
Module 3: Preparing for Installation .....	693
Module 4: Installing Windows Server 2003 .....	694
Module 5: Rolling Out Windows XP Professional .....	695

Module 6: Remote Installation Services .....	696
Module 7: Windows Server 2003 Networking Environment .....	697
Module 8: Setting Up and Managing a Network .....	698
Module 9: Using Active Directory and Domains .....	699
Module 10: Communications and Internet Services .....	700
Module 11: Internet Information Services Version 6 .....	701
Module 12: Virtual Private Networking .....	702
Module 13: Terminal Services and Remote Desktop .....	703
Module 14: Managing Storage and File Systems .....	704
Module 15: Setting Up and Managing Printing and Faxing .....	705
Module 16: Managing Windows Server 2003 .....	706
Module 17: Controlling Windows Server 2003 Security .....	707
 Index .....	 709
