ACKNOWLEDGMENTS	xix
INTRODUCTION	xxi
1 DBA Cheat Sheet	1
2 Database Creation and Management	29
Introduction to Oracle Database Creation	30
Creating a Database: Prerequisites	30
Creating a Database: The create database Command	31
Creating a Database: Security Issues	33
Creating a Database: Recommended Practices	34
The create database Command: Examples	35
Creating a Database Manually: A Checklist	36
Creating a Database: Error Resolution Table	44
Other Typical Errors Associated with the create database Command	46
The alter database Command	47
Functions of the alter database Command	47
Common Tasks Accomplished with alter database	48
Error Messages Associated with the alter database Command	53
Removing Your Oracle Database	55
3 Rollback/Undo Segments, Control Files, and Redo Logs	57
Oracle Undo	58
Automated Undo Management	58
Manual Rollback Segment Administration	62
Monitoring Rollback Segments and Automated Undo	66
Oracle Errors Associated with Rollback Segments and Automated Undo	68
Control File Administration	71
Control File Backups	72
Moving the Control File	72
Restoring the Control File	73
Renaming the Database	74
Oracle Errors Associated with Control Files	76

Online Redo Log Administration	78
The Basics of Online Redo Logs	78
Creating New Redo Log Groups	79
Creating New Redo Log Members	80
Dropping an Online Redo Log Group	80
Dropping an Online Redo Log Group Member	81
Resizing Online Redo Logs	81
Clearing an Online Redo Log	81
Monitoring Online Redo Logs	81
Archived Redo Logs	82
Oracle Errors Associated with Online Redo Logs	82
4 Tablespaces	85
About Oracle Tablespaces	86
The Oracle Tablespace	86
Temporary Tablespaces	89
Undo Tablespaces	90
Creating Tablespaces	90
extent_management_clause	91
segment_management_clause	92
Security Requirements	92
About OMF	93
create tablespace Examples	94
Altering Tablespaces	95
Security Requirements	96
alter tablespace Examples	96
Dropping Tablespaces	97
Security Requirements	98
drop tablespace Examples	98
Tablespace Data Dictionary Information	98
Tablespace-Related Errors	99
Tablespace Naming Standards	100
Datafile Naming Standards	101
5 Tables	103
Oracle Data Types	104
Notes on Various Data Types	107
Table Types	112
Relational Tables	113
Temporary Tables	113
External Tables	113
Index-Organized Tables	113
Constraints	114
Table Attributes	114
Parallel Processing	115
Partitioning	116
Other Table-Related Features	116

Creating Tables	117
Security Requirements	117
Sizing Tables Assigned to a Locally Managed Tablespace	121
Examples of Using the create table Command	121
Altering Tables	128
Security Requirements	128
Altering Nonpartitioned Table Examples	129
Altering Partitioned Tables	134
Dropping Tables	136
Security Requirements	136
Examples	136
Table-Related Data Dictionary Information	137
Table-Related Errors	138
Table-Related Recommended Standards	139
6 Indexes	141
Indexing Overview	142
Oracle Index Types	142
Miscellaneous Index Features	146
Creating Indexes	153
Security Requirements	153
Examples Using the create index Command	153
Altering Indexes	157
Security Requirements	158
Nonpartitioned alter index Examples	158
Examples Using the Partitioned alter index Commands	160
Dropping Indexes	161
Security Requirements	161
Drop Index Example	162
Index-Related Data Dictionary Information	162
Index-Related Errors	162
Recommended Standards	163
Index Location Standards	164
Index Naming Standards	164
7 Views	165
Updateable Views	166
Other View Considerations	168
Security Benefits of Views	168
View Triggers	168
Creating Views	169
Security Requirements	169
Examples of Using the create view Command	169
Altering Views	171
Security Requirements	171
alter view Examples	171

Dropping Views	172
Security Requirements	172
drop view Examples	172
View-Related Data Dictionary Information	172
View-Related Errors	173
View-Related Recommended Standards	173
8 Clusters	175
Cluster Performance	176
Creating Clusters	177
Security Requirements	177
create cluster Examples	177
Altering Clusters	178
Security Requirements	179
Examples of Using the alter cluster Command	179
Dropping Clusters	179
Security Requirements	179
drop cluster Example	179
Cluster-Related Data Dictionary Information	180
Cluster-Related Errors	180
9 Sequences and Synonyms	183
Sequences	184
All About Sequences	184
Creating Sequences	184
Altering Sequences	186
Dropping Sequences	188
Sequence-Related Data Dictionary Information	188
Sequence-Related Errors	188
Sequence-Related Recommended Standards	189
Synonyms	189
Creating Synonyms	189
Altering Synonyms	192
Dropping Synonyms	192
Synonym-Related Data Dictionary Information	193
Synonym-Related Errors	193
Synonym-Related Recommended Standards	193
10 Users, Profiles, Roles, and Grants	195
Administration of Users	196
Creating Users	197
Altering Users	197
Dropping Users	198
User-Related Data Dictionary Information	199
User-Related Errors	199
User-Related Recommended Standards	200
Administration of Profiles	200
Creating Profiles	202
Altering Profiles	203

Dropping Profiles	204
Profile-Related Data Dictionary Information	204
Profile-Related Errors	205
Administration of System and Object Privileges	205
Object Grants	205
System Grants	206
Using the with admin option Clause	210
Using the with grant option Clause	211
Public Grants	211
Granting Privileges	211
Revoking Privileges	213
System and Object Privileges Data Dictionary Information	213
System and Object Privileges–Related Errors	214
System and Object Privileges–Related Recommended Standards	215
Administration of Roles	215
Common Oracle-Provided Roles	216
Creating Roles	216
Altering Roles	217
Dropping Roles	217
Role-Related Data Dictionary Information	218
Role-Related Errors	218
11 Miscellaneous Administrative Features	219
Oracle Export Utility	220
The exp Utility Command Line	220
exp Utility Examples	222
Oracle Import Utility	224
The imp Utility Command Line	224
imp Utility Examples	226
Oracle Data Pump (Oracle Database 10g)	228
Oracle Data Pump Export	228
Oracle Data Pump Import	233
Oracle Data Pump Interactive Mode	237
Data Pump Export: Interactive Mode Parameters	238
Oracle Backups	239
Oracle Database Cold Backups	240
Oracle Database Hot Backups	241
Other Oracle Backups	243
Database Recovery	244
Recovering from a Manual Cold Backup (In NOARCHIVELOG Mode)	244
Recovering from a Manual Cold Backup (In ARCHIVELOG Mode)	245
Recovering from an RMAN Cold Backup (NOARCHIVELOG Mode)	245
Recovering from an RMAN Cold Backup (In ARCHIVELOG Mode)	245
Recovering from a Manual Hot Backup	245
Recovering from an RMAN Hot Backup	247
Incomplete Database Recovery	248
Database Control File Recovery	249

12 The Optimizer	253
Optimizer Modes	254
Rule Based Optimizer (RBO)	254
Cost Based Optimizer (CBO)	254
SQL Tuning	255
Reduce the Work	255
Balance the Work	255
Fine-Tune the Work	255
Identifying Poor SQL	256
V\$SQL View	256
SQL Trace	256
Statspack	257
Automatic Database Diagnostic Monitor	257
Tuning Advisors	258
Optimizer Statistics	258
analyze Command	258
dbms_stats Package	259
Automatic Statistics Gathering	267
Execution Plans	267
Access Paths	267
Joins	268
Optimizer Hints	269
Specifying Hints	269
Optimizer Mode Hints	270
Access Path Hints	270
Join Hints	272
Parallel Hints	272
Miscellaneous Hints	273
explain plan Command	274
Running explain plan	274
Displaying explain plan Output	275
Interpreting explain plan Output	275
dbms_xplan Package	276
Plan Stability	277
Creating Outlines	278
Using Outlines	278
Moving Outlines	279
Managing Outlines	279
13 Miscellaneous Commands	281
The alter system Command	282
Security Requirements	282
alter system Examples	282
alter system–Related Data Dictionary Information	286
alter system–Related Errors	286
The alter session Command	288
Security Requirements	288
Examples of Using the alter session Command	288

alter session–Related Data Dictionary Information	292
alter session–Related Errors	292
The create directory/drop directory Commands	293
Security Requirements	293
create directory Examples	293
drop directory Example	293
create directory– /drop directory–Related Data Dictionary Information	294
create directory– /drop directory–Related Errors	294
The comment Command	295
Security Requirements	295
comment Examples	295
comment–Related Data Dictionary Information	296
comment–Related Errors	296
The lock table Command	296
Security Requirements	296
lock table Examples	297
lock table–Related Data Dictionary Information	297
lock table–Related Errors	298
The purge Command	298
Security Requirements	298
purge Examples	298
purge–Related Data Dictionary Information	299
purge–Related Errors	300
The rename Command	300
Security Requirements	300
rename Examples	300
rename–Related Data Dictionary Information	301
rename–Related Errors	301
The set constraints Command	301
Security Requirements	301
set constraints Examples	301
set constraints–Related Data Dictionary Information	302
set constraints–Related Errors	302
The set transaction Command	302
Security Requirements	303
set transaction Examples	303
set transaction–Related Errors	303
The create database link/drop database link Commands	304
Security Requirements	304
create database link/drop database link Examples	304
create database link– /drop database link–Related Data Dictionary Information	305
create database link–Related Errors	306
14 Built-in Functions	307
Introducing Oracle Built-in Functions	308
Single-Row Functions	308
Aggregate Functions	315

Analytic Functions	316
Object Reference Functions	318
Model Functions	318
Examples of Commonly Used Functions	318
15 DML Commands	335
The select Command	336
Security Requirements	336
Common Elements in a select Command	336
Other Elements in a select Command	341
select Command–Related Error Messages	355
The insert Command	356
Security Requirements	356
Specifics of the insert Command	356
insert Command–Related Error Messages	360
The update Command	361
Security Requirements	361
Specifics of the update Command	361
update Command Examples	362
update Command–Related Error Messages	363
The delete Command	364
Security Requirements	364
Specifics of the delete Command	364
delete Command Examples	365
delete Command–Related Error Messages	365
The merge Command	366
Security Requirements	366
Specifics of the merge Command	366
merge Command Examples	366
merge Command–Related Error Messages	367
The commit Command	368
Security Requirements	368
commit Command Examples	368
The savepoint Command	368
The rollback Command	368
Security Requirements	368
rollback Command Examples	369
The truncate Command	369
Security Requirements	369
Specifics of the truncate Command	369
truncate Command Examples	370
truncate Command–Related Error Messages	370
Writing Readable DML Statements	370
A Initialization Parameters	373
Parameter Files	374
Initialization Parameter File	374
Server Parameter Files	374

Displaying Parameter Values	375
show parameter	375
V\$System_PARAMETER	376
V\$PARAMETER	376
V\$PARAMETER2	376
V\$SPPARAMETER	376
The Parameters	377
B Data Dictionary Views	411
USER_, ALL_, and DBA_	412
DBA_ View	412
Miscellaneous Views	424
V\$ Views	425
C Oracle SQL Syntax	435
Index	579
